Preshen Govender

Software Developer

PROFILE

I am a junior software developer with a degree in Computer and Information Sciences, specializing in Application Development from Varsity College. Proficient in a multitude of different stacks, I possess strong organizational skills, attention to detail, and a self-driven attitude for continuous learning. Successful in quickly building skills, self-teaching and acquiring new knowledge. Motivated to learn, grow and excel in a growth-orientated company. Experienced in the integration and deployment of an Arduino-based sensor system for a hydroponic farm, along with developing a mobile application for remote monitoring and control.

EXPERIENCE

EasyGames (2024 - Present)

JUNIOR SOFTWARE ENGINEER

As a Junior Software Engineer at EasyGames, I demonstrated proficiency in diverse technology stacks while actively contributing to multiple projects, showcasing a strong ability to meet stringent deadlines. Through this experience, I honed my adaptability and problem-solving skills, gaining hands-on expertise in navigating the challenges of a dynamic game development environment. My role included:

- The entire software development lifecycle, including front-end development, backend optimization, and database management
- Refactoring code and improving the optimisation of previous code.
- Handling of important data and allowing for bets to occur.
- Working on multiple projects at a time and understanding the code behind each project.

My time at EasyGames not only enhanced my technical capabilities but also underscored my commitment to delivering high-quality software solutions in a fast-paced setting.

Dipar System (2023-01-05 - 2023-01-11)

FULL STACK DEVELOPER INTERN

As a Full Stack Intern at Dipar System, I had the opportunity to hone my skills in Angular, C#, and SQL while actively contributing to the development of web applications. During this internship, I gained hands-on experience in both front-end and back-end development, working on a wide range of projects. My responsibilities included:

- Collaborating with a team of developers to create dynamic and user-friendly web applications using Angular for the front-end.
- Building robust server-side components and APIs using C# to ensure seamless communication between the front-end and database.

My six month internship at Dipar Software Company allowed me to apply theoretical knowledge to real-world software development, enhancing my skills and proficiency in the specified technologies and methodologies. It was a valuable experience that has greatly contributed to my professional growth in the field of full-stack development.

Thirst (2022 - 2023)

BARTENDER

During my tenure as a Bartender, I gained extensive experience in the art of mixology and provided exceptional customer service. My responsibilities included:

- Preparing and serving a wide range of alcoholic and non-alcoholic beverages, including cocktails, beers, and wines, with precision and creativity.
- Maintaining a well-organized bar area, ensuring that it was fully stocked with all necessary ingredients, garnishes, and equipment.
- Collaborating with bar staff and management to develop and update drink menus, as well as participating in staff training and development.
